

React Native Developer:

Job Description

We are looking for a mobile developer interested in building performant mobile apps on both iOS and Android platforms. You will be responsible for architecting and building these applications, as well as coordinating with the teams responsible for other layers of the product infrastructure. Building a product is a highly collaborative effort, and as such, a strong team player with a commitment to perfection is required.

Roles And Responsibilities:

- Design and build pixel-perfect, buttery smooth UIs across both mobile platforms
- Leverage native APIs for deep integrations with both platforms
- Diagnose and fix bugs and performance bottlenecks for performance that feels native
- Reach out to the open source community to encourage and help implement mission-critical software fixes-React Native moves fast and often breaks things
- Maintain code and write automated tests to ensure the product is of the highest quality
- Transition existing React web apps to React Native

Skills And Requirements:

- Knowledge of Object-Oriented Programming
- Complete familiarity with Javascript and capability that is optimized and works perfectly
- Capability to write Well-deocumented code with Javascript that is easily readable
- Having the knowledge of third-party dependencies and debugging dependencies conflicts that might occur
- Understanding of native build tools like Xcode, Gradle etc
- Experience in testing with tools like Jest, Detox, Cypress etc

- Knowledge about Offline Storage, Rest APIs, and document request model
